MAHER DHAMI

Mumbai, Maharashtra | +91 8356948244 | dhamimaher@gmail.com
linkedin.com/in/maher-dhami-a15197225 | github.com/maherdhami | maher-dhami-q7im.vercel.app

AI/ML and Generative AI engineer (B.Tech Computer Engineering, CGPA 8.64/10) with hands-on experience building and shipping RAG systems, LLM-powered analytics tools, and predictive ML models across multiple end-to-end projects, plus founder-level experience leading a 3-person team through an EdTech venture that trained 20+ students. Founder and host of The Young Founder Show, a podcast featuring AI engineers, startup founders, product leaders and education pioneers.

EDUCATION

B.Tech, Computer Engineering — Shah & Anchor Kutchhi Engineering College (SAKEC)
2024 – 2028 | CGPA: 8.64 / 10

TECHNICAL SKILLS

Languages: Python, C, C++

ML / Deep Learning: Machine Learning, Deep Learning, NLP, XGBoost, Scikit-Learn, Clustering, Anomaly Detection, TF-IDF, Feature Engineering, Cross-Validation

GenAI / LLMs: LLMs, RAG, LangChain, Groq API, Ollama, ChromaDB, Vector Databases, Hugging Face, Llama 3, Prompt Engineering, Semantic Search, Embeddings

Data & Visualization: NumPy, Pandas, NLTK, Matplotlib, Seaborn, Jupyter Notebook

Web, Backend & Deployment: FastAPI, Streamlit, HTML, CSS, Vercel, Render, Streamlit Cloud Deployment

Leadership: Team Leadership, Podcast Hosting & Interviewing, Public Speaking, Mentoring, Cross-Functional Collaboration, Time Management

LEADERSHIP & EXPERIENCE

Founder & Host | The Young Founder Show (Podcast) *October 2026 – Present*

- Launched and host a podcast of long-form conversations with founders, engineers, and product leaders on startups, AI, careers, and building institutions; manage guest outreach, episode planning, recording, and promotion.

Founder & CEO | CodiePag *Jan 2025 – Oct 2025*

- Founded an EdTech venture teaching coding and AI fundamentals; led a team of three.
- Delivered 3 workshops for 20+ students.

Student Coordinator | SAKEC Technology Business Incubator (TBI) *Feb 2025 – Jul 2025*

- Coordinated entrepreneurship and innovation programming, aligning student teams, mentors, and institutional stakeholders on incubation initiatives.

Social Media Co-Head | CSI SAKEC *September 2025 – August 2026*

- Own content planning and digital outreach strategy; track engagement metrics to inform branding campaigns.

PROJECTS

Autonomous AI Data Analyst Studio

Tailwind CSS | Python | FastAPI | Pandas | NumPy | Groq API | Vercel | Render

Live App: autonomous-ai-data-analysts.vercel.app/

- Developed and deployed a full-stack AI-powered data analytics platform using Python FastAPI, enabling users to explore datasets through a modern web interface.
- Implemented automated dataset profiling, data quality assessment, statistical analysis and data processing using Pandas and NumPy, with interactive visualizations.
- Integrated Groq-powered LLM capabilities for natural-language dataset querying, analytical explanations and AI-assisted business insights.
- Architected frontend-backend REST API communication and deployed the frontend on Vercel and the FastAPI backend on Render, making the application accessible through a production web deployment.

AI Knowledge Assistant (RAG)

Python | Streamlit | LangChain | Ollama | ChromaDB | Hugging Face | Llama 3 | RAG

Live App: ai-knowledge-assistant-7.streamlit.app

- Built a full-stack RAG system letting users query uploaded PDFs or websites and receive source-grounded answers, cutting hallucinated responses versus a standalone LLM.
- Engineered an ingestion pipeline that chunks source text, generates dense vector embeddings with Hugging Face sentence-transformer models, and indexes them in ChromaDB for fast semantic retrieval.
- Orchestrated retrieval + generation with LangChain, pairing top-matching chunks with a locally hosted Llama 3 model via Ollama for private, zero-cost inference.
- Shipped an interactive Streamlit interface supporting live document upload and multi-turn, source-cited conversation.

Student Success Intelligence Platform

Python | XGBoost | Clustering | Anomaly Detection | Streamlit | Scikit-Learn

- Built an end-to-end analytics platform predicting student outcomes and flagging at-risk learners for early intervention.
- Achieved 71.08% accuracy with an XGBoost classifier, validated via cross-validation and hyperparameter tuning in Scikit-Learn.
- Layered unsupervised clustering and anomaly detection on top of predictive scoring to surface behavioral cohorts and atypical risk patterns invisible to the classifier alone.
- Delivered results through a live Streamlit dashboard giving educators per-student risk scores and cohort views.

Early Dropout Risk Detection Using Language & Behavior

Python | XGBoost | Scikit-Learn | NLP | Pandas | NumPy

- Built an early-warning system fusing academic performance, behavioral engagement signals, and NLP-derived linguistic features to flag dropout risk.
- Engineered sentiment, lexical-diversity, and engagement features from student text and combined them with structured academic data.
- Trained and tuned an XGBoost classifier, benchmarking against Scikit-Learn baselines to select the top-performing risk predictor.

Social Media Virality Prediction

Python | TF-IDF | Clustering

- Used TF-IDF text features, clustering, and engagement analytics to predict how far content will travel.

Additional Projects

PDF & YouTube Summarizer (LangChain, Ollama, Streamlit); **Maharana Pratap RAG** (LangChain, ChromaDB, Ollama); **E-commerce Customer Intelligence** (NLP sentiment analysis); **Movie Recommendation System** (preference modelling and classification); **AI-OS** (Vercel).

CERTIFICATIONS

- Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp — Udemy
- Complete Generative AI Course with LangChain and Hugging Face — Udemy
- ML Problem Solving Bootcamp — SAKEC
- Artificial Intelligence Beginners Guide — Simplilearn
- C Programming Bootcamp – The Complete C Language Course — Udemy
